We Found Our New “Power Up”!

By Carl Hinschen

On 12 March 4 Year 7 students participated in their first Science and Sustainability UniFY lesson.

The students are Kimo Viljoen, Carl Hinschen, Tamika Brecknell and Brittany Pattemore.

The UniFY activity is an extra-curricular activity for students that excel in school work, particularly Science.

The activity goes for 60-70 minutes every Tuesday for a 10 week period. In every session the students learn in-depth information about renewable energy sources and how they can be used to sustain the Earth. The course is delivered via an eLearning classroom being guided by a teacher from the Brisbane School of Distance Education (BSDE).

Over the 10 week period the four students must design and complete an eco-friendly island resort on a real Whitsunday island using the computer application Google Sketch Up 8.

The design must not only include buildings but must also include designs for furniture. The resort must be powered by its own natural resource of electricity (solar and wind, etc.).

Participants in the project reported the following:

“It is pretty interesting and fun learning about how to use all of the Power Up tools, especially Google Sketch up.” (Brittany Pattemore 7A and Kimo Viljoen 7B.)

Year 6 News

By Callum Etalahoo & Taylah Mason

The 2013 Year Six classes are unique in the history of Queensland because they are the last Year Six to do Grade 7.

Year 6 were also the first year to do prep instead of pre-school. They are the test case for Queensland and mark an important change for education.

Year Six are currently learning history on a timeline and about how Australia became a nation.

Year Six are also interested in art because they said it gives them a chance to be creative, on the other hand, Year Six are less enthusiastic about English!

Year Six students are also doing tasks on Mathletics such as dot plots, Venn diagrams and multiplying decimals.

Year 6 are especially looking forward to their Camp in Term 3 and A+ days.

Did You Know?

- Locusts have leg muscles that are about 1000 times more powerful than an equal weight of human muscle.
- Hummingbirds are so agile and have such good control that they can fly backwards.
- The horn of a rhinoceros is made from compacted hair rather than bone or another substance.
- Sharks lay the biggest eggs in the world.

DID YOU KNOW?

- BE RESPECTFUL–KEEP YOUR HANDS AND FEET TO YOURSELF. SPEAK NICELY TO OTHERS.
